

ABOUT

Portable Collapsible Bunding

Stratex Collapsible (or drive-over) Portable Bunds are ideal for the safe and compliant storage of drums, plant and equipment while containing any hazardous liquid leaks and spills. It features a collapsible sidewall which is quick and easy to access for vehicles, forklifts and trolleys.

Engineered to withstand tough conditions and made from long lasting heavy duty 900gsm PVC material. Portable collapsible bunding is resistant to punctures, tears, abrasions, UV radiation, temperature extremes, hydrocarbons, oils, methane and alkalis.

FEATURES

- Stratex collapsible or drive-over portable bunds offer a quick, efficient and durable solution for indoor or outdoor use.
- Collapsible side wall allows access for vehicles, forklifts, drum and pallet trolleys, while providing containment for any incidental spills.
- Compact design for easy transport and storage.
- Can be erected in seconds with no tools needed.
- Ideal for pump and generator bunding, dewatering, temporary storage of tanks, drums, heavy equipment and vehicle wash bays.
- Strong lap joint welds provide excellent rip, tear and puncture resistance.
- Fuel and chemical resistant.
- Includes eyelets for securing with pegs on soft ground
- Side supports can be lowered in seconds to provide true drive in / drive out capability.
- Custom sizing and extra heavy duty XR5 geomembrane material available by request.
