

ABOUT

Drum Bund Work Floor

Stratex Drum Bund Work Floor is a flexible decking solution for creating liquid handling workstations and storage areas to fit your workplace. Low profile design gives easy access to drum tops and requires less effort to load and unload drums.

All work floors and ramps have a slip resistant texture that provides traction to prevent slips and falls. Joint connector strips can be added for superior safety and finish. Two different lengths of connectors and a cross connector is available

KEY FEATURES

- Supports safe and compliant liquid drum storage.
- Can be customised to suit various requirements.
- Heavy duty polyethylene construction.
- Slip resistant surface finish.
