

ABOUT

Poly Drum Trolley

This compact chemical handling trolley is purpose-built for safe, reliable, and easy transport of liquid containers in industrial and laboratory environments.

Manufactured from medium-density polyethylene (MDPE), it combines lightweight operation with outstanding resistance to a wide range of chemicals, ensuring long service life even in demanding conditions.

With capacity to securely hold 4 × 25L cans, the trolley helps improve efficiency while reducing manual handling risks. For smooth manoeuvrability, it is fitted with rear swivel/brake castors, making it easy to position exactly where needed.

- Rear brakes & swivel castors
- Lightweight
- 100ltr sump capacity
- Stainless steel handle
- Broad range chemical compatibility
- UV stabilised
