

ABOUT

Polyurethane Drain Cover

Polyurethane drain covers are the simplest of all drain covers. Just remove from its cover, unroll, and place it on the drain. The tacky, flexible polyurethane cover forms a tight seal to block out contaminants.

These covers temporarily bond to any smooth surface and are resistant to most chemicals including oils, fuels and solvents. Easily cleaned and reused - just wash with warm soapy water and wrap in plastic sheet.

Five sizes of covers are available, and a vinyl holdall can also be purchased separately for high visibility storage.

TO ORDER

Code	Description	Size	UOM
DRP8010	Polyurethane Drain Cover	460 x 460mm	Each
DRP8011	Polyurethane Drain Cover	610 x 610mm	Each
