

ABOUT

Chemical Absorbent Cushion

Absorbent cushions are excellent for absorbing the bulk of a contained spill when a pad isn't enough. They are lightweight, compact and simple to use. Cushions can be placed under leaks or stuffed into holes and other hard to reach places.

Each Stratex absorbent cushion can absorb up to 4.5 litres of liquid.

Chemical absorbents are designed to contain and absorb hazardous liquids such as acids, caustics, oils, coolants, solvents, and other solutions.

FEATURES:

- Rapid and easy to use spil absorption
- Ideal for capturing leaks, drips and absorbing bulk liquids.
- Suitable for confined and hard to reach areas.
- Huge 4.5 litre capacity.
