

ABOUT

Chemical Absorbent Rolls

Chemical absorbents are designed to contain and absorb hazardous liquids such as acids, caustics, oils, coolants, solvents and other solutions. They are fast acting with high absorbency rates, ideal for use in laboratories, hospitals and chemical storage areas.

Absorbent rolls offer the same great benefits of absorbent pads, except on a roll. Rolls are best used with a dispenser - Stratex offers wall mount and floor standing dispensers to keep your absorbent rolls within easy reach and free of contamination.

Absorbent rolls are a popular choice for heavy machinery workshops or liquid handling and storage areas, in which spills are just part of everyday life. Stratex absorbent rolls provide superior performance and quality for a rapid no-fuss clean up.

BENEFITS

- Bonded to provide maximum strength
- Premium quality and fast absorbing
- Non-allergenic, non-hazardous with no dust
- Simple to use without the need for specialised PPE

APPLICATIONS

- Mining
- Construction
- Heavy Machinery
- Workshops
- Maintenance
- Aviation
- Chemical
- Laboratories
- Marine
