Oil & Fuel Absorbent Pads

Stratex Oil and Fuel Absorbent Pads are designed to absorb and contain hydrocarbon spills including oil, fuel, solvents, petrol and diesel. These absorbents repel water, meaning they are ideal for outdoor environments and when spills occur on waterways such as drains, ports, marinas, harbours, lakes and rivers. The hydrophobic (water repellent) absorbents will float even when fully saturated with oil.

Super absorbent pads are used to absorb and clean up oil and fuel spills, leaks and drips. Perforations allow them to be easily divided so you can get the right size pad for the spill and prevent wastage.

- Bonded to provide maximum strength
- Premium quality and fast absorbing
- Non-allergenic, non-hazardous with no dust
- Simple to use without the need for specialised PPE
